WARNING:

• Warning information in the User Manual, on the product and packaging must always be read before use and explained to anyone using this product.

• For maximum protection, helmet must fit well and snug, be properly positioned and securely fastened. Please refer to the User Manual for the correct way to wear this helmet.

• This helmet is for children between the ages of 5 and 10 years. This helmet is not a snowmobile helmet and is only suitable for use in non-motorized recreational snow play activities under competent adult supervision.

• No helmet can protect the wearer from all foreseeable impact. Depending on the type of impact, even a low speed accident can result in a serious head injury or fatality.

• This helmet can only provide a level of protection for areas that it covers. It does not protect the neck and spine, and other bodily injuries.

• This helmet is designed to absorb shock by partial destruction of the energy absorbing liner. This damage may not be visible. Therefore, if subjected to a severe blow, the helmet should be destroyed and replaced even if it appears undamaged.

• Do not use for (alpine) skiing or snowboarding.

• Any injuries caused due to the failure of following the instructions for proper fit will void all warranties. This is expressed and implied to the maximum extent permitted by law.

• Clean the headgear with mild soap and water only. Do not use any solvent to clean the product, such as hydrocarbons, cleaning fluids and paints.
This Snowslider snow play helmet uses an adjustable chin strap that can easily be fastened and unfastened with a quick-release buckle. Fasten the chin strap and make certain everything is snug.

1. To tighten the chin strap, hold the buckle and pull the excess strap through.

2. To lower the front of the helmet, tighten the chin strap or pull the side straps on both sides of the helmet down through the slide lock, until the helmet is level just above the eyebrow line.

3. To raise the front of the helmet, loosen the chin strap or pull the rear straps on both sides of the helmet by pulling it down through the slide lock, until the helmet is level just above the eyebrow line.

4. Adjust all four straps on both sides of the helmet to balance the length of each strap.

5. All helmet padding should be flush against the head and the helmet must fit closely on your head. The ear covers or cheek padding should also fit closely.

6. Use the dial on the back of the helmet to make small adjustments to the back padding (if applicable) to fine-tune the fit of the helmet. To tighten the rear padding, turn the dial clockwise. To loosen the rear padding turn the dial counterclockwise. (Fig. 2)

To check for proper tension, put on the helmet and fasten the buckle. You should feel the strap pulling against your chin when open your mouth.

The helmet should not be able to roll forward or backward easily and it should not be possible to remove the helmet without unfastening the buckle. (Fig. 3)

Important:
- Always wear your helmet in the proper position.
- Fasten your buckle and tighten your chin strap at all times.
- All adjustments should be checked each time the helmet is worn, making sure the fit is always snug.
- Inspect your helmet regularly.
- Always try the helmet on for size that fits snugly and feels secure and comfortable on your head.
- If the helmet is damaged, it should be destroyed and replaced immediately.
- Do not wear anything hard or sharp under your helmet.
- Do not take any unnecessary risks just because you are wearing the helmet.
